

Report to:	HEALTH AND WELLBEING BOARD
Date:	12 November 2015
Executive Member / Reporting Officer:	<p>Cllr Lynn Travis – Executive Member Health and Neighbourhoods</p> <p>Angela Hardman – Director of Public Health</p> <p>Jacqui Dorman – Public Health Intelligence Manager</p>
Subject:	PUBLIC HEALTH OUTCOMES FRAMEWORK-SUMMARY UPDATE
Report Summary:	<p>This paper provides an update for the Health and Wellbeing Board (HWBB) members regarding the current position of the Tameside Public Health Outcome Framework (PHOF) indicators and the comments and any issues surrounding the indicators within the PHOF.</p>
Recommendations:	<p>Members of the HWBB read and digest the indicators and any comments against each indicator in the PHOF so they are aware of any emerging issues or concerns with indicator movements.</p>
Links to Health and Wellbeing Strategy:	<p>The PHOF Healthy lives, healthy people: Improving outcomes and supporting transparency sets out a vision for public health, desired outcomes and the indicators that will help us understand how well public health is being improved and protected.</p> <p>The framework concentrates on high-level outcomes to be achieved across the public health system that cover the full spectrum of public health. The outcomes reflect a focus not only on how long people live, but on how well they live at all stages of life.</p>
Policy Implications:	<p>The PHOF focuses on achieving positive health outcomes for the population and reducing inequalities in health. The majority of indicators in this framework have the potential to impact on inequalities. The Public health outcomes framework links closely with the Joint Strategic Needs Assessment and Health and Wellbeing Strategy.</p>
Financial Implications: (Authorised by the Section 151 Officer)	<p>There are no direct financial implications for the Council relating to this update.</p>
Legal Implications: (Authorised by the Borough Solicitor)	<p>The data published in the tool are the baselines for the Public Health Outcomes Framework, with more recent and historical trend data where these are available. The baseline period is 2010 or equivalent, unless these data are unavailable or not deemed to be of sufficient quality.</p> <p>A list of indicators updated, for the most recent and previous releases can be found in the Public Health Outcomes Framework Collection within www.gov.uk.</p>

Data are published as part of a quarterly update cycle in August, November, February and May. The next update will be on Tuesday 2 February 2016. Public Health Outcomes Framework data will be revised and corrected in accordance with Public Health England's Official Statistics Revisions and corrections policy and the Code of Practice for Official Statistics. This data enables the Board to consider where there are inequalities where strategies and resources need to be focussed.

Risk Management :

That the PHOF be used in the wider context along with other national and local intelligence to build a complete picture of health and wellbeing in Tameside. The PHOF indicators are updated intermittently throughout the year when the data becomes available. Public health Intelligence locally manage the nationally released data in the format of a local scorecard to allow us locally to assess trends and changes in indicator performance and to add context on what we are doing locally to improve outcomes for our residents
