Members noted that the first edition of the Greater Manchester Brexit Monitor was appended to the report and would be produced monthly to update GMCA and provide a real-time snap shot of the economic and policy impact of Brexit.

Members noted that clarification was needed from Government with regard to ERDF and ESF funding and financial instruments for Greater Manchester post Brexit. In addition, the provision of science funding and Greater Manchester's ability to maintain research development networks in Europe was highlighted as important.

The Chair noted that the ability to maintain international consortia also depended up on the ability to retain or attract personnel, particularly in universities and within the health service where a number of EU nationals were employed. Work was to be undertaken to identify any particular trends to this regard.

A Member suggested that the GM Public Sector apprenticeship approach should give consideration of national standards in order to avoid duplication. Any standard approach for GM should be generic enough to take in to account different local authority area requirements and that consideration should be given to whether apprentices should be drawn from school leavers, college leavers or graduates.

A Member suggested that transport issues for young people to access opportunities needed to be included in the process.
