

Better Care Fund 2022-23 End of Year Template

6. Year-End Feedback

The purpose of this survey is to provide an opportunity for local areas to consider and give feedback on the Better Care Fund. There is a total of 5 questions. These are set out below.

Selected Health and Wellbeing Board:

Tameside

Part 1: Delivery of the Better Care Fund

Please use the below form to indicate to what extent you agree with the following statements and then discuss your response.

Statement:	Response:
1. The overall delivery of the BCF has improved joint working between health and social care in our locality	Agree
2. Our BCF schemes were implemented as planned in 2022-23	Agree
3. The delivery of our BCF plan in 2022-23 had a positive impact on the integration of health and social care in our locality	Agree

Part 2: Successes and Challenges

Please select two Enablers from the SCIE Logic model which you have observed demonstrable success in progressing. Please provide a brief description alongside.

Please provide a brief description alongside.

4. Outline two key successes observed toward driving the enablers for integration (expressed in SCIE's logical model) in 2022-23	SCIE Logic Model Enablers, Response category:
Success 1	8. Pooled or aligned resources
Success 2	2. Strong, system-wide governance and systems leadership

5. Outline two key challenges observed toward driving the enablers for integration (expressed in SCIE's logical model) in 2022-23	SCIE Logic Model Enablers, Response category:
Challenge 1	3. Integrated electronic records and sharing across the system with service users
Challenge 2	6. Good quality and sustainable provider market that can meet demand

Footnotes:

Question 4 and 5 are should be assigned to one of the following categories:

1. Local contextual factors (e.g. financial health, funding arrangements, demographics, urban vs rural factc
2. Strong, system-wide governance and systems leadership
3. Integrated electronic records and sharing across the system with service users

4. Empowering users to have choice and control through an asset based approach, shared decision making
 5. Integrated workforce: joint approach to training and upskilling of workforce
 6. Good quality and sustainable provider market that can meet demand
 7. Joined-up regulatory approach
 8. Pooled or aligned resources
 9. Joint commissioning of health and social care

e impact of the BCF.

Detail any further supporting information in the corresponding comment boxes.

Comments: Please detail any further supporting information for each response

Due to the nature of collaborative working in the locality the BCF has aimed to solidify that joined up working and approach to system wide approaches around management of investment for the betterment of system wide management of capacity within the health and care system.

The investment was implemented as agreed.

The investment supported reinforcing collaborative working which was already present within the locality.

Progressing and two Enablers which you have experienced a relatively greater degree of

Response - Please detail your greatest successes

In relation to projecting the older population of Tameside over the next 21 years, the over 80 year old and over 90 year old population is expected to increase by 69% and 92% respectively. The over 65 population is also expected to increase by nearly 20%. This is in contrast to other age groups which see much smaller growth.

The purpose of the Acute Frailty Service is to avoid unwarranted hospital admission for older people presenting with acute frailty syndromes, and to reduce their length of stay where admission does occur.

The locality have strong system wide leadership which looks to include all providers across the system and during 22/23 this was further embedded following the establishment of ICBs. The locality partnerships embedded an integrated programme approach to improvement oversee at both executive and operational levels. Collaboration and development of improvement schemes. The detailed work has been done through smaller working groups working with partners via our leads in both health and ASC with operational oversight a key feature of our locality Urgent Care board and weekly Executive LOS meeting

Yes

Response - Please detail your greatest challenges

Data sharing continues to be a significant barrier to effective MDT approaches. The work being done around the adoption of the Greater Manchester Shared Care Record and associated digitisation of care planning should look to support this, however there is significant clinical governance required to support this which may look different within each neighbourhood footprint.

The Care Home and Home Care market continues to be an area of focus for our locality with the aim to create and support sustainable partners to support patient flow through the system and provide suitable options for our population. 22/23 saw provider engagement in the national fair cost of care exercise enabling a clear understanding of the challenges faced in the sector. Winter discharge funding provided some short term relief enabling the locality to stabilise the market in the short term.
