Did you know 18 pubs a week closed in 2018?

Did you know that when you buy a house in close proximity of a pub noise from a beer garden or people coming and going from the pub is expected?

Not once have I suggested that people are not entitled to live in their home in peace.

Once a pub closes they tend to be sold and turned into Mini Supermarkets, HMO's or sometimes up for let for a period of time. An empty pub has a high chance of being vandalised, broken into and a hotspot for Anti Social Behaviour.....

If you don't support your local and work with your landlord there is a high chance you could find you local pub in the situation above!

Can I ask everyone to Share this Status
