

GMPF's Responsible Investment Partners and Collaborations

2 Degrees Investing Initiative

This climate scenario analysis provides a forward looking assessment of how GMPF's corporate bond and equity holdings compare to a 2°C transition scenario. It helps GMPF to better understand the potential for misallocation of capital and financial risk under a 2°C transition and where GMPF's holdings stand in those industries which are deemed to be the most important in relation to climate change.

Global Mining & Tailings Safety Initiative

GMPF has been involved in and backed this initiative. Spearheaded by the Church of England Pensions Board and the Swedish Council of Ethics of the AP Pension Funds the initiative aims to tackle the problem of tailings dam safety. PIRC, in its capacity as research and engagement partner to LAPFF, requested a stakeholder engagement component to the initiative, to which the organisers readily agreed. This engagement has highlighted significant discrepancies between company accounts of these disasters and community experiences, prompting important questions for investors regarding the investment propositions of the companies involved.

Trucost

GMPF uses this external organisation to measure its carbon footprint for the actively managed corporate bond and equity holdings. Trucost's backward looking method uses the information from the companies' most recent reports, and third-party sources, to measure the level of GHG emissions of the company over the last year. As such, GMPF's carbon footprint is a measure of its emissions over the last year. This gives GMPF the ability measure itself against a benchmark and take a view on where to focus efforts for engagement.
